

**CURRICULUM VITAE**  
**Mirza Humaun Kabir Rubel, PhD**  
**Associate Professor**  
**Department of Materials Science and Engineering**  
**University of Rajshahi, Rajshahi-6205, Bangladesh**  
**E-mail: [mhk\\_mse@ru.ac.bd](mailto:mhk_mse@ru.ac.bd); [mirzamse@gmail.com](mailto:mirzamse@gmail.com)**  
**Skype name: mhk\_mse**  
**Contact Number: +880-1714657365**

### **Objective**

**Application for postdoctoral position, visiting scholar or research assistant in the Institute of Inorganic Chemistry, Germany**

### **Research Interests**

The  $\text{ABO}_3$ -type perovskite oxides and its derivatives such as double perovskites (DPs) and/or quadruple perovskites (QPs) are a broad group of inorganic materials that bears great importance, because of their properties to applications can be tailored by the substitution of different elements in the crystal lattices. This rich diversity is the primary reason for their interesting physical and chemical properties such as superconductivity, magnetism, ferroelectricity, magneto-electric multiferroicity, dielectric permittivity, catalytic activity etc. Recently, Bi-based double-perovskite oxides have become a new series of magnetic materials showing superconductivity; in the midst of them the novel A-site ordered double perovskite and simple perovskite bismuthates have been explored that discovered a novel series of perovskite superconducting system and some other new compositional superconductors by adjusting both compositions and hydrothermal reaction conditions. These findings provide a guiding principle for the exploration of new Bi-based high temperature superconductors with the relationship between superconductivity and long-range ordering in the crystal lattices. In addition, the structure, compositional homogeneity, and the morphology of the synthesized magnetic materials have been examined using high resolution-SXRD and Neutron diffraction (ND) data, High-resolution-STEM, Scanning Electron Microscopy (SEM) and FT-IR techniques. Besides, various interesting physical properties including magnetic susceptibility, transport properties and thermal behavior was investigated on the sample pellets by high pressure using sophisticated PPMS and SQUID systems. In addition, the static and lattice dynamic behaviors of polar nano-regions (PNRs) in ferroelectric compounds with  $\text{ABO}_3$ -type structure is one of current interesting phenomena, have been investigated by inelastic light scattering. However, the synthesis routes of these perovskites are not so convenient. In recent years, many efforts have been devoted to explore new multifunctional materials and improving the synthesis methods of existent compounds. Among them, Hydrothermal and Solvothermal synthesis methods to these materials increasingly investigated for the direct crystallisation of the solid products especially complex oxide materials by employing various solvents and solution additives. These methods have significant advantages for the crystal formation from the nano- to micron-scale, the isolation of compositions, and lead to scalable processes for exploring materials at moderate temperatures that are not possible utilizing conventional solid-state routes. During the course of this investigation, my research interest concentrate to search new compositional materials either in powder or single crystal mode with novel and interesting properties using a variety of techniques especially a facile environment friendly hydrothermal and/or solvothermal methods to improve the quality of multifunctionality of materials. Furthermore, my research experiences deal with simulation of structural model from experimental (SXRD and ND) data by Rietveld method employing the computer Programs. I am also curious to execute first-principles study to understand material systems, structures, and their related properties in the frame work of density functional theory (DFT) based on software package CASTEP-code. The first principles study already have predicted structural, mechanical, thermal, and electronic properties of perovskites to understand material system precisely.

## **Research Skills and Expertise**

### **Experimental and Computational methodology:**

Hydrothermal reaction (autoclave & electric Oven), High-pressure and High-temperature (HPHT) synthesis (cubic anvil-cell), Solid-state-reaction (SSR) method (high-temperature furnace), Sol-gel process, Organic gel route, Multifunctional Structural Materials, DFT-calculations (CASTEP-code).

### **Characterization techniques:**

Single-crystal analysis, Magnetic susceptibility and Superconductivity (SQUID-Dynacool), Laboratory X-rays and powder diffraction, Synchrotron & Neutron diffractions (Powder diffraction), Rietveld refinements (RIETAN-FP), Resistivity and transport measurements (PPMS-Quantum Design), Thermal analysis (TG-DTA & TG-mass), Microstructure and Morphology (SEM-analysis), Nano-structure, Elemental mapping and Electron diffraction (TEM-analysis), UV-Spectroscopy, Atomic Force Microscopy (AFM), FT-IR, Chemical analysis (ICP, EDX & XRF).

## **CURRENT POSITION**

**Associate Professor,  
at Department of Materials Science and Engineering,  
University of Rajshahi.**

Rajshahi-6205, Bangladesh,  
June, 2017–Present.

## **EDUCATION**

**PhD in Physics/Materials Science, University of Yamanashi**

Yamanashi, Japan,  
September, 2015.

**Dissertation title:** Study on Preparation of Superconducting Perovskite-type Bismuth Oxides by Hydrothermal Reaction  
**University of Yamanashi.**

**M. Sc. (Thesis)** in Solid State Physics (study conducted in English)

Rajshahi-6205, Bangladesh,  
April, 2008.

**Dissertation title:** “Morphogenesis of Phosphosilicate compounds with mixed divalent metal oxide  $x/2\text{Pbx}/2\text{ZnO}(1-x-z)\text{SiO}_2\text{zP}_2\text{O}_5$  with  $z = 50, 40, 30, 20, 10$  mol% and  $x = 0, 20, 40, 60, 80$  mol%”

**University of Rajshahi.**

Rajshahi-6205, Bangladesh,  
October, 2006.

**B. Sc. (Honours)** in Physics (study conducted in English)

**University of Rajshahi.**

## **GRANTS AND AWARDS**

**Dean's Award-2020, Faculty of Engineering,** University of Rajshahi

Rajshahi-6205, Bangladesh,  
November 2020.

**Research grants,—Faculty of Engineering,**  
University of Rajshahi.

Rajshahi-6205, Bangladesh,  
June-2016 & October-2018.

**Dissertation fellowship,** Special Doctoral Program for Green Energy Conversion Science and Technology,  
University of Yamanashi.

Yamanashi, Japan,  
October, 2013–September 2015.

<b>Research Assistant fellowship</b> , University of Yamanashi	Yamanashi, Japan, 2012.
<b>United Group Paper Award</b> , UNITED GROUP	Dhaka-1212, Bangladesh, 2019.
<b>Poster Award</b> , The 4th International Seminar on Green Energy Conversion Science;-Summer School for Young Scientists-University of Yamanashi.	Yamanashi, Japan, August 26, 2015.
<b>PRESS RELEASE</b> on Discovery of New Superconducting Double Perovskite Oxide; Visit: <a href="http://www.inorg.yamanashi.ac.jp/English/27">http://www.inorg.yamanashi.ac.jp/English/27</a>	Center for Crystal Science and Technology University of Yamanashi, Japan, Date: 03/03/2014. SPring-8, beam line BL02B2 (Powder diffraction), Hyogo, Japan. Date: 03 Mar, 2014.
<b>Press Release on</b> “Superconducting double perovskite bismuth oxide ( $\text{Na}_{0.25}\text{K}_{0.45}(\text{Ba}_{1.00})_3(\text{Bi}_{1.00})_4\text{O}_{12}$ ) prepared by a low-temperature hydrothermal reaction” Visit: <a href="http://www.spring8.or.jp/en/news_publications/press_release/2014/140303/">http://www.spring8.or.jp/en/news_publications/press_release/2014/140303/</a>	1155 Sixteenth Street N.W. Washington, DC 20036. Date: 30 March, 2019.
<b>Certificate of Recognition</b> , ACS Publication Awards-2018	Certificate No: SDI/HQ/PR/Cert/61707/MIR, 2020
<b>Certificate of Reviewing</b> , The editors of Journal of Physics and Chemistry of Solids.	SDI/HQ/PR/Cert/62742/MIR, 2020

## TEACHING & RESEARCH EXPERIENCE

### Teaching and Course Direction:

#### Postgraduate level (Mater's level)

Magnetic Materials; Advanced Nuclear Engineering; and Advanced Ceramics.

**at Dept. of Materials Science and Engineering (MSE),**  
University of Rajshahi.

**Undergraduate level (B.Sc. Engg. & B.Sc. Honors)**

Rajshahi-6205,Bangladesh,  
2015–Present.

Rajshahi–6205, Bangladesh

Crystallography and Structure of Materials, Magnetic and Dielectric  
Materials, Glass and Ceramics, Phase diagram and Microstructure  
of Materials, Design and Selection of Engineering Materials.

**at Dept. of Materials Science and Engineering (MSE),**  
University of Rajshahi.

**Guest Lecturer and Research Assistant,**  
**at Dept. of Glass and Ceramic Engineering (GCE),**  
Rajshahi University of Engineering and Technology (RUET)  
**Dissertation Co-supervisor**, Master's and PhD level  
**at Dept. of Materials Science and Engineering and Physics**  
University of Rajshahi.

**Graduate Student (Doctoral course),**  
**at Center for Crystal Science and Technology,**  
University of Yamanashi.

**Research Internship, at Materials and Structural Laboratory,**  
Tokyo Institute of Technology (TIT).

**Research Internship, at Inorganic Synthesis Chemistry**  
**Laboratory**, Faculty of Engineering, Hokkaido University  
**Experience on synchrotron X-ray experiments**, at SPring-8,  
beamline BL02B2 (Powder Diffraction).

Rajshahi-6204, Bangladesh  
2015-presnt.  
Rajshahi-6205, Bangladesh  
2015-present.

Yamanashi, Japan  
October 2012- September 2015.  
4259 Nagatsuta, Kanagawa  
226-8503 (Japan). 2013–2015.

Sapporo 060-8628, Japan,  
2014-2015.  
Hyogo, Japan, 2013–2015.

## CONFERENCES AND MEETINGS

1. **Mirza H. K. Rubel**, M Emrul Kayesh, and M Rafiqul Ahsan. Structural Investigation of  $\text{Na}_2\text{O-SiO}_2-\text{B}_2\text{O}_3$  Glasses by Infrared Spectra. Poster presentation, International Conference on Physics of Today-2012, 15-16 March, 2012, BUET, Bangladesh.
2. **Mirza H. K. Rubel**, Akira Miura, Takahiro Takei, Nobuhiro Kumada. Preparation of a new superconductive bismuth oxide by hydrothermal reaction Poster presentation, Annual Meeting of the Ceramic Society of Japan, 17-19 March, 2013, Tokyo Institute of Technology (TIT), Okayama campus, Meguro, Tokyo, Japan.
3. **Mirza H. K. Rubel**, Takahiro Takei, Nobuhiro Kumada. Superconducting bismuth double perovskite oxide  $(\text{Na}_{0.25}\text{K}_{0.45})(\text{Ba}_{1.00})_3(\text{Bi}_{1.00})_4\text{O}_{12}$  prepared by low temperature hydrothermal reaction. Poster presentation, The 2<sup>nd</sup> International Seminar for ‘Green Energy Conversion Science and Technology’ September 2-4, 2013, Nagano, Japan.
4. **Mirza H. K. Rubel**, Takahiro Takei, Nobuhiro Kumada. Low-temperature hydrothermal synthesis of a new double perovskite-type bismuthate  $(\text{Na}_{0.25}\text{K}_{0.45})(\text{Ba}_{1.00})_3(\text{Bi}_{1.00})_4\text{O}_{12}$ . Oral presentation, The 2<sup>nd</sup> International Symposium on Inorganic and Environmental Materials (ISIEM) October 27-31, 2013. University of Rennes-1, France.
5. **Mirza H. K. Rubel**, Akira Miura, Takahiro Takei, Nobuhiro Kumada, Kengo Oka, Masaki Azuma, Eisuke Magome, Chikako Moriyoshi, Yoshihiro Kuroiwa. Low temperature hydrothermal synthesis of a new superconductive double perovskite bismuth oxide  $(\text{Na}_{0.25}\text{K}_{0.45})(\text{Ba}_{1.00})_3(\text{Bi}_{1.00})_4\text{O}_{12}$ . Oral presentation, 第52回セラミックス基礎科学討論会, 9-10 January, 2014, Nagoya, Japan.
6. **Mirza H. K. Rubel**, Akira Miura, Takahiro Takei, Nobuhiro Kumada, Kengo Oka, and Masaki Azuma. Effect of hydrothermal synthesis temperatures on superconducting properties of double perovskite bismuth oxides. The 3<sup>rd</sup> International Seminar for Special Doctoral Program ‘Green Energy Conversion Science and Technology’, August 25-27, 2014, Hokuto, Yamanashi, Japan.
7. **Mirza H. K. Rubel**, Akira Miura, Takahiro Takei, Nobuhiro Kumada, Effect of hydrothermal synthesis temperatures on superconducting and some other properties of double perovskite bismuth oxides. Oral presentation

第 27 回秋季シンポジウム, 27<sup>th</sup> Fall Meeting of The Ceramic Society of Japan, September 9-11, 2014, Kagoshima University, Japan.

**8. Mirza H. K. Rubel**, Akira Miura, Takahiro Takei, Nobuhiro Kumada. Hydrothermal synthesis of a new Bi based  $(\text{Ba}_{0.82}\text{K}_{0.18})(\text{Bi}_{0.53}\text{Pb}_{0.47})\text{O}_3$  superconductor. Oral presentation, Fall meeting of Ceramic society of Japan, January 7-8, Kyoto, Japan.

**9. Mirza H. K. Rubel**, Akira Miura, Takahiro Takei, Nobuhiro Kumada, poster presentation Preparation of new Bi based simple and double perovskite-type superconductors by hydrothermal reaction. Poster presentation, The Annual Meeting of the Ceramic Society of Japan, Date: March 18-20, 2015, Okayama University, Japan.

**10. Mirza H. K. Rubel**, M. S. Ali, M. M. Rahaman, M. Aftabuzzaman, and A. K. M. A. Islam. Bi-based New Superconductor  $(\text{K}_{1.00})(\text{Ba}_{1.00})_3(\text{Bi}_{0.85}\text{Na}_{0.15})_4\text{O}_{12}$ : First-principle Study. PP-74, International conference on Physics-2016, 10-12 March, Atomic Energy Centre, Dhaka, Bangladesh.

**11.** K. M. Hossain, M. I. Hossain, **Mirza H. K. Rubel**, M. M. Rahaman. Hydrothermal synthesis, phase analysis and characterizations of lead-free ferroelectric  $\text{BM}^{2+}(\text{Zn}, \text{Ca}, \text{Mg})\text{T-BFO}$  system. Conference on "Weather Forecasting and Advances in Physics"-2018, 11-12 May, Khulna University of Engineering & Technology (KUET), Khulna-9203, Bangladesh.

**12.** Md. Imran Hossain, K. M. Hossain, **Mirza H. K. Rubel**, M. M. Rahaman. Hydrothermal Synthesis, Crystal Structure and Characterizations of Multiferroic Perovskites  $\text{RSrTiFeO}_6$  ( $\text{R} = \text{Mg, Zn, Co, Ba}$ ) Compound. Conference on "Weather Forecasting and Advances in Physics"-2018, 11-12 May, Khulna University of Engineering & Technology (KUET), Khulna-9203, Bangladesh.

**13.** Md. Abdus Sattar, Md. Abdul Halim, **Mirza H. K. Rubel**, A. Rahman, M. M. Rahman. M. K. Rahman. Effect of Al on the optical and structural properties of spray pyrolysed  $\text{Al/ZnO}$ : Al thin films. International Conference on Material Science and Semiconductor Devices (ICMMD) 2018, 7th and 8th September 2018, Department of Electrical and Electronic Engineering, University of Dhaka, Bangladesh.

**14. Mirza H. K. Rubel**, Khandaker Monower Hossain, Anjuman Ara Khatun, M. Anwar Hossain, M. M. Rahaman, M. Mozahar Ali, M. M. Hossain, J. Hossain, Md Rasadujjaman, S. Kojima, N. Kumada, An *ab-initio* study on physical properties of  $\text{Pd}^{2+}$  incorporated double perovskites  $\text{CaPd}_3\text{B}_4\text{O}_{12}$  ( $B = \text{Ti, V}$ ). National Conference on Physics - 2019, 07-09 February 2019; University of Dhaka, Dhaka, Bangladesh.

**15. Mirza H.K. Rubel**, S.K. Mitro, B.K. Mondal, M.M. Rahaman, Md Saiduzzaman, J. Hossain, A.K.M.A. Islam, N. Kumada, Newly synthesized double-perovskite superconductor  $(\text{Ba}_{0.54}\text{K}_{0.46})_4\text{Bi}_4\text{O}_{12}$ : A DFT investigation, 3rd International Conference on "Physics for Sustainable Development & Technology (ICPSDT-2019)", 18-19 December, 2019, Department of Physics, Chittagong University of Engineering Technology (CUET), Chattogram, 4349, Bangladesh.

**16. Mirza H.K. Rubel**, S.K. Mitro, B.K. Mondal, M.M. Rahaman, Md Saiduzzaman, J. Hossain, A.K.M.A. Islam, N. Kumada, Newly synthesized double-perovskite superconductor  $(\text{Ba}_{0.54}\text{K}_{0.46})_4\text{Bi}_4\text{O}_{12}$ : A DFT investigation, **International Conference on Physics 5-7 March, 2020; Atomic Energy Centre Dhaka, Bangladesh.**
